# LIMEADE TURNOVER DASHBOARD

The Limeade Turnover Dashboard analyzes aggregated data from eligibility files so you can explore how well-being program participation impacts employee turnover.

## EMPLOYEE WELL-BEING IMPACTS TURNOVER

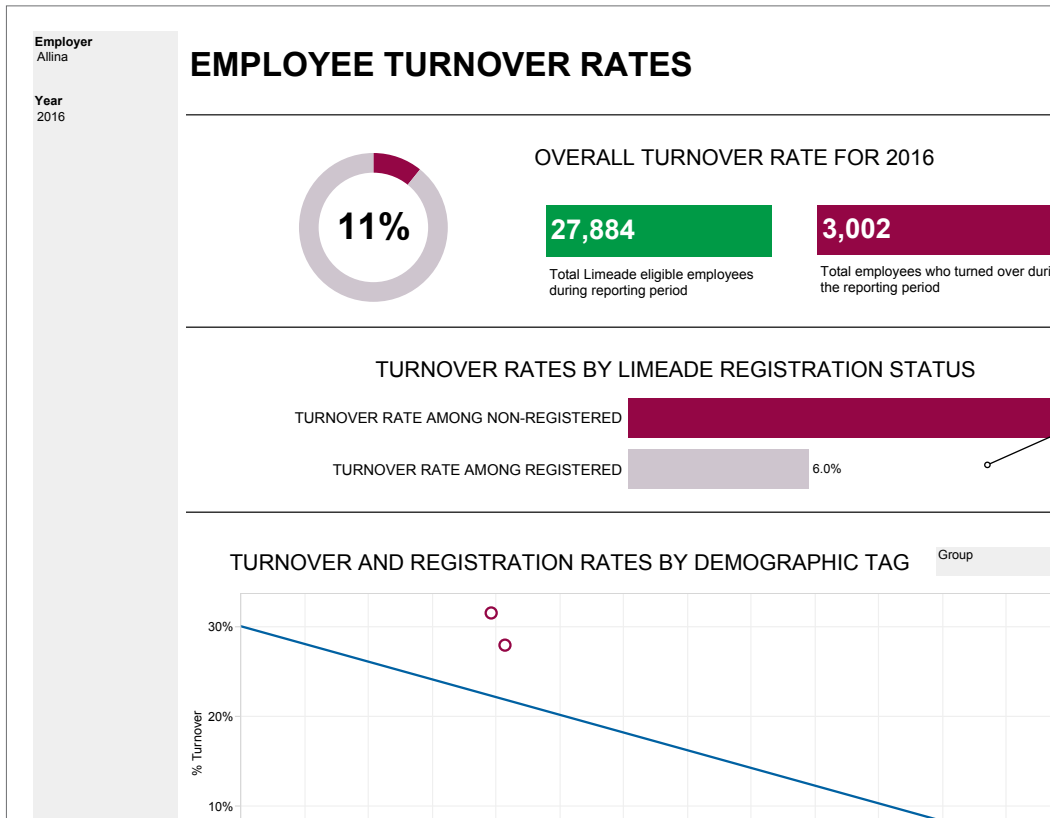

Limeade Institute research reveals a connection between employee well-being and business results.

TURNOVER RATES WERE

# 3x HIGHER

for employees who **DIDN'T PARTICIPATE IN THE LIMEADE PROGRAM** vs. those who did. <sup>1</sup>

<sup>1</sup> Limeade Turnover Dashboard, February 2019

THE LIMEADE PROPRIETARY ALGORITHM USES 40 DIFFERENT DATA INPUTS - INCLUDING WELL-BEING ASSESSMENT RESPONSES AND PLATFORM ACTIVITY - TO CALCULATE TURNOVER RISK BY EMPLOYEE GROUP.

## DASHBOARD BENEFITS

The Limeade Turnover Dashboard identifies high-risk areas within an organization based on a variety of tags including location, gender, department and employment status.

By identifying specific groups with higher turnover risk, you can make data-driven program decisions that could reduce employee turnover.

To protect employee privacy, aggregate data won't appear for groups with fewer than 20 individuals. The dashboard can't provide reasons for potential turnover.
